

AUTHORS INSTRUCTION

"MEDISCOPE" is the official journal of Gazi Medical College, Khulna, Bangladesh published twice in a year in the month of January and July.

Submission of manuscripts

Papers are accepted for publication with an understanding that they are submitted solely to the journal and are subject to peer review and editorial revision. Statement and opinions expressed in the papers, communications and letter in the journal are those of author(s) and not necessarily of the editors or publishers. Two hard copies along with a soft copy should be sent to the **Editor-in-Chief, MEDISCOPE, Gazi Medical College, A 19-21, Mazid Sarani, Sonadanga, Khulna-9100, Bangladesh. Email: mediscope@gmc.edu.bd or mediscopegmch@gmail.com;** (a soft copy of doc and pdf files in case of email submission).

The journal publishes the following: Full Papers, Short Communications, Review Articles, Letters to the Editors, Commentaries, Debate and Opinion Papers, Experience Sharing, and Editorials.

Short Communications. Papers submitted as Short Communications should consist of about 2000 words.

Review Articles. These are received on invitation only. Please contact the Editorial Office with any queries regarding the submission of potential review articles.

Letters to the Editors/ Debate and Opinion Papers. Letters are invited that discuss, criticize or develop themes put forward in papers published in the journal or that deal with matters relevant to it. They should not be used as a means of publishing new work. Acceptance will be at the discretion of the Editorial Board, and editorial changes may be required. Wherever

possible, letters from responding authors will be included in the same issue.

Form of full papers submitted for publication. Full papers should be no more than 4000 words long. The onus of preparing a paper in a form suitable for sending to press lies with the author. Authors are advised to consult a current issue in order to make themselves familiar with the journal's typographical and other conventions, layout of tables, etc. Authors are also encouraged to consult the latest guidelines produced by the International Committee of Medical Journal Editors (ICMJE), which contains a lot of useful generic information about preparing scientific papers. (http://www.icmje.org/urm_main.html)

Manuscripts should be typed on one side of white good quality A4 size paper, with wide margins of at least 2 cm and using double space throughout, the preferred font being Times New Roman size 12. At the ends of lines words should not be hyphenated unless hyphens are to be printed. Page numbering is required. Spelling should generally be that of the Concise Oxford Dictionary (1995), 9th ed. Oxford: Clarendon Press.

Each component of the manuscript should begin on a new page in the sequence of title page, abstract, text, reference, tables and legends for illustration. The title page should include the title of the paper, name of the author(s), and name of the departments(s) to which the work should be attributed. An abstract of not more than 250 words should follow the title page. It should provide the following sections: Background, Objectives, Materials and Methods, Results and Conclusion. The text should be presented in the form of Introduction, Materials and Methods, Results, Discussion, Acknowled-

gement (if any) and References.

References

These should be given in the text using the Vancouver system. They should be numbered consecutively in the order in which they first appear in the text using superscript. If a reference is cited more than once the same number should be used each time. References cited only in tables and figure legends and not in the text should be numbered in sequence order of mention of the individual tables and figures in the text. At the end of the paper, on a page(s) separate from the text, references should be listed in numerical order. The journal adheres closely to the Vancouver style of references (see http://www.icmje.org/urm_full.pdf, updated April 2010). The first six authors of a work should be named, followed by "et al." if there are more than six. The issue number should be omitted if there is continuous pagination throughout a volume. Names and initials of authors of unpublished work should be given in the text as 'unpublished results' and not included in the References. Titles of journals should appear in their abbreviated form using the NCBI Link Out page <http://www.ncbi.nlm.nih.gov/books/NBK3827/table/pubmedhelp.pubmedhelptable45/>.

References to books and monographs should include the town of publication and the number of the edition to which reference is made.

References to material available on websites should include the full Internet address, and the date of the version cited.

Tables

Each table should be typed in on separate sheet. Table should have brief title for each, should be numbered consecutively using Roman Numerals and be cited in the text in consecutive order. If possible, internal horizontal and vertical rules should not be used.

Illustration

All drawings should be made with black Indian ink on white paper. All illustrations must be in JPEG format at a resolution of 300 dots/inch (DPI) or higher. Photographs and Photomicrographs should be supplied as glossy black and white prints unmounted and having internal scale markers, the original magnification and the stain used. Line diagrams and graphs should be scanned at 600 DPI or better and submitted on separate sheets. Legend for each illustration should be submitted in separate sheets. All photographs, graphs and diagrams should be referred to as figures numbered consecutively in the text in Arabic numerals.

Abbreviation

Except for units of measurement,

abbreviations are discouraged. Consult scientific style and format. The CBE Manual for Authors, Editors and Publishers (Sixth edition. New York: Cambridge University Press, 1994) for lists of standard abbreviations. The first time an abbreviation appears it should be preceded by the words for which it stands.

Drug names

Generic names should generally be used. When proprietary brands are used in research, include the brand name in parentheses in the Materials and Methods section.

Permission

Materials taken from other source must be accompanied by a written statement from both authors and publishers giving permission to the Journal for reproduction. Obtain written permission from at least one author of papers still in press, unpublished data and personal communications.

Authorship

The uniform requirements for manuscripts submitted to biomedical journal state that authorship credit should be based only on

substantial contribution to a) conception and design or analysis and interpretation of data, b) drafting the article or revising it critically for important intellectual content, and c) final approval of the version to be published.

Editorial procedure

All articles on receipt for publication are immediately registered but this does not mean that it has been accepted for publication. The manuscript is sent to two or more reviewers who take minimum one month time for masked peer review. One marked copy of the proofs may be sent to the principal author for careful correction of errors. One corrected copy must be returned to the Editor-in-Chief within the next 3 days. Major alteration in the text will not be accepted. The ultimate authority to accept or reject the article rests with the Editorial Board.

Clarifications are sought from the authors when required. Letter of acceptance can be issued only after approval of the article. No article is rejected unless similar comments are received from at least two reviewers. Ethical aspects will also be considered in the assessment of papers.
